PART 01

Company

Introduction

Background history

# Development Milestones

Established in Hong Kong in 1994, focusing on the local plastic products market and building a customer base.

Launched the first line of daily plastic products, gaining market recognition.

Hong Kong Office

Our first PP factory established in China in 1993, the second one in 1996, to produce PP stationery.

In 2010, Vietnam factory of 9000 square meters was established in Hung Yen Province, with employees of around 200.

Production Development

Expanded product lines to include daily, industrial, and eco- friendly plastic products. There also expanded more than 2000 square meters in 2015 and the ISO 9001 certificate was acquired, perfected the quality control system, and enhanced market competitiveness.

Maturity

# PART 02

Products and

Services

PP Plastic products & Related

# Product Range

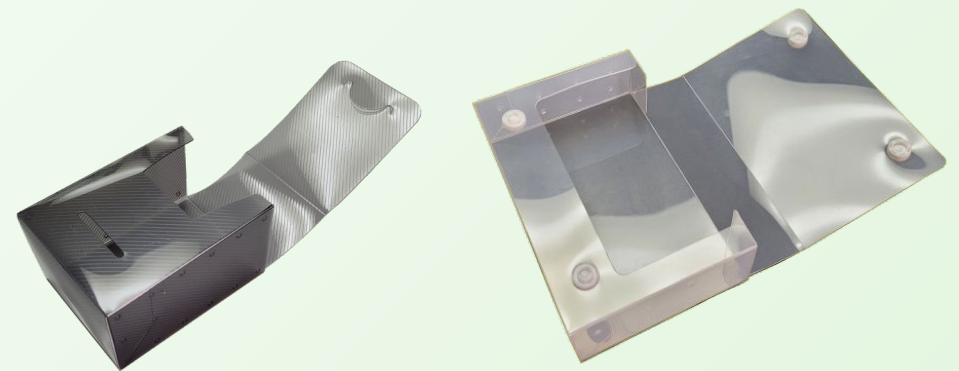

## PP Plastic Products

A wide range of folders, binders, clipboard, display book, expanding files, zipper bags, profolio files made from high-quality PP plastic materials, ensuring safety and durability. Diverse storage carry boxes and cases designed for various applications in homes and offices.

## Plastic Packaging Items

Plastic pouches for clothes and carry bags for gifts are designed for diverse industries applications. Packaging materials like plastic boxes and wallets, envelope, protector sheets or plain sheets are tailor for products protection during transportation.

# Service Highlights

## Customized Design

Provide ODM/OEM services, designing unique products based on customer brand positioning and requirements.

Experienced design team quickly responds to customer needs, offering professional design solutions.

## Rapid Prototyping and Delivery

Advanced prototyping equipment and a professional team ensure fast and high- quality prototyping. Optimized supply chain management improves production efficiency, enabling rapid delivery to meet urgent customer needs.

## Technical Support and After-Sales Service

Technical team provides support for product use and maintenance. A comprehensive after- sales service system handles customer feedback promptly, ensuring high customer satisfaction.

# PART 03

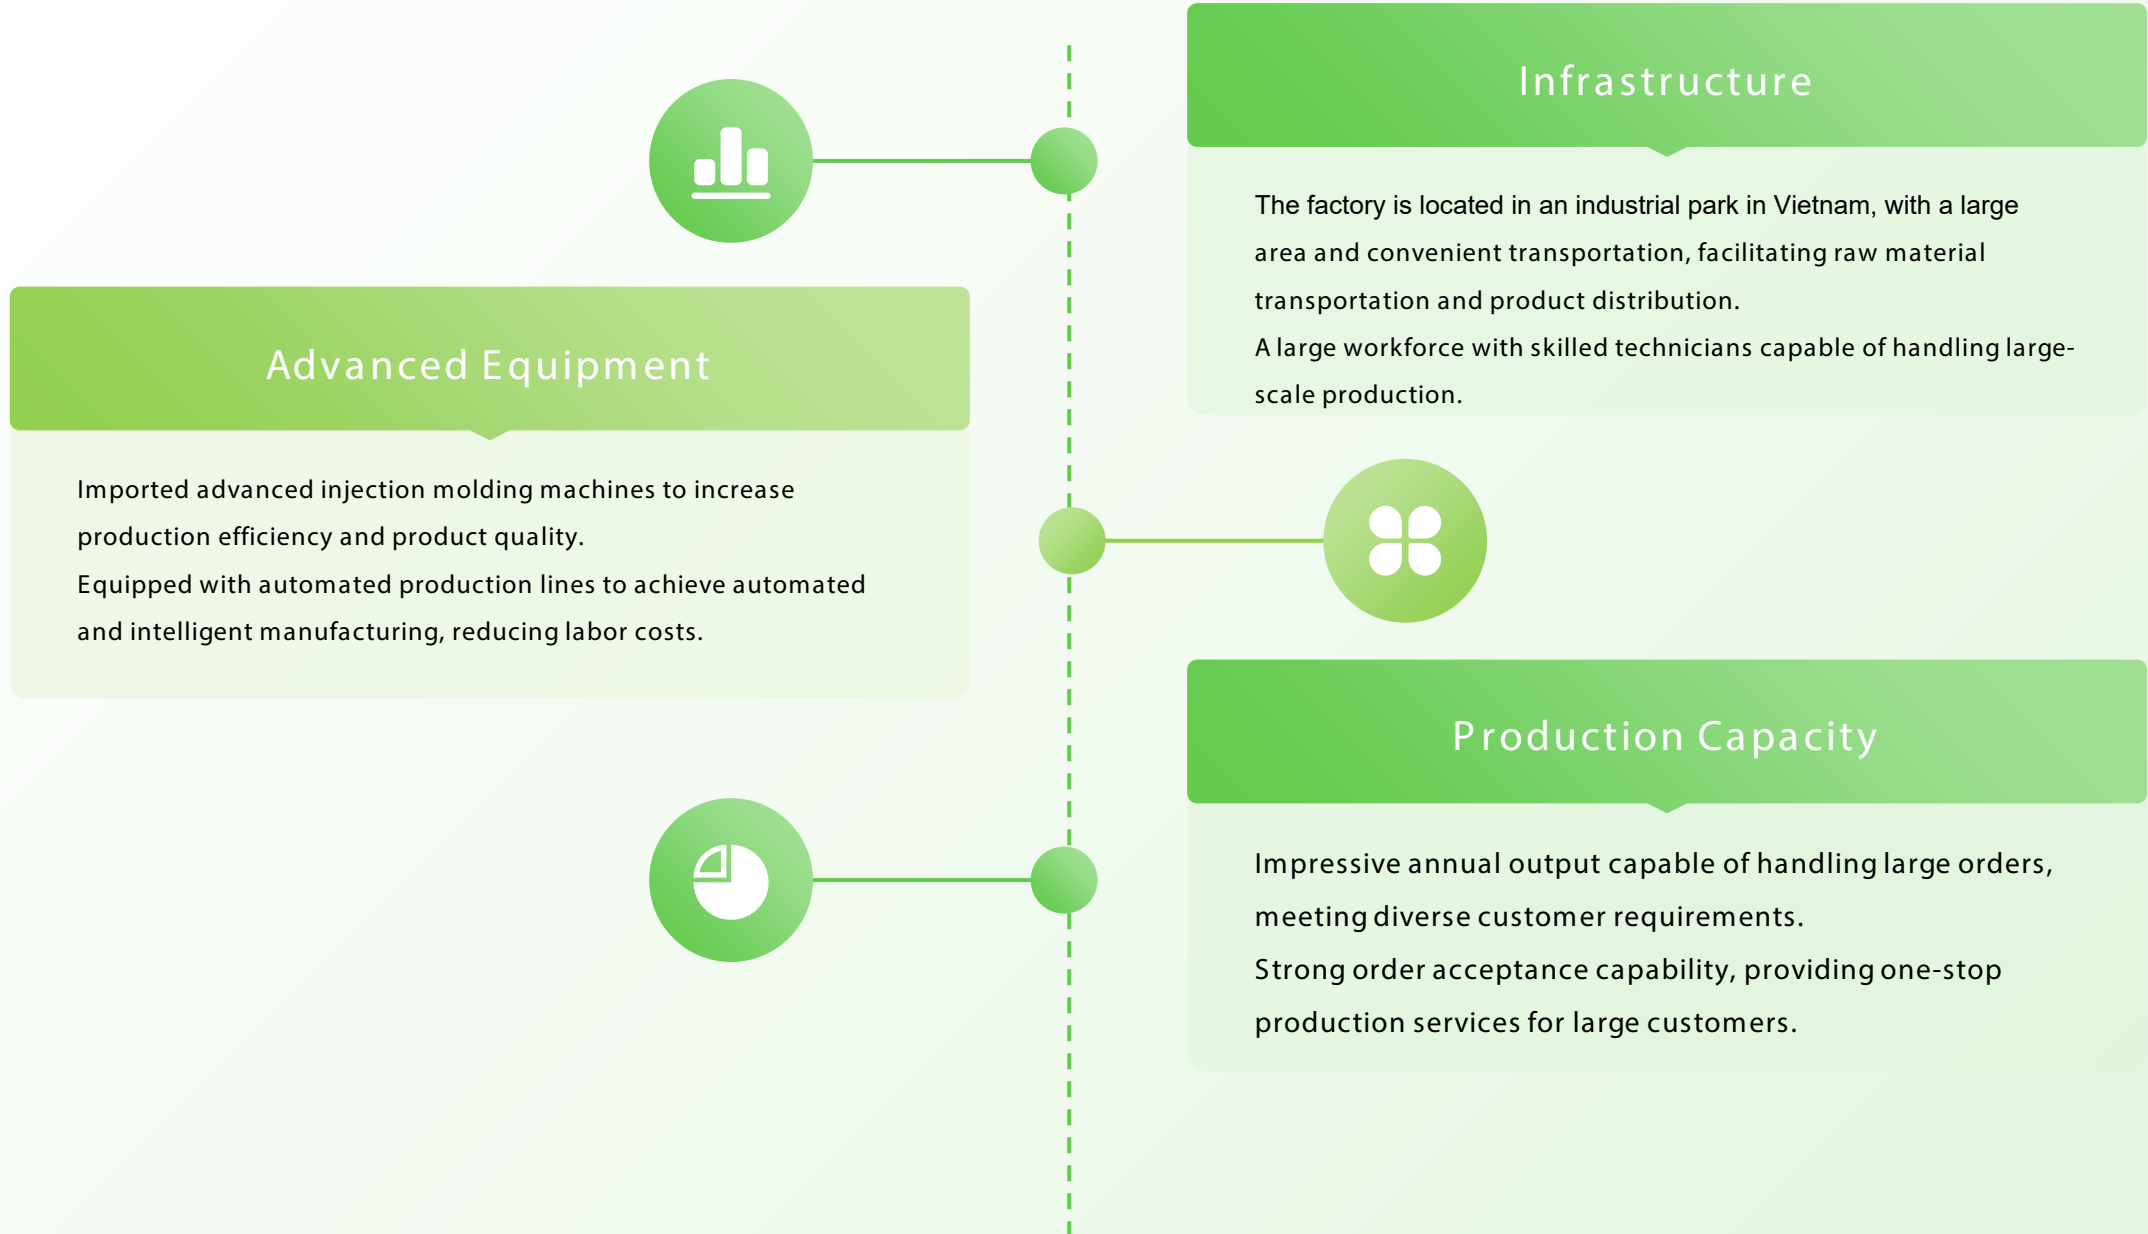

## Production Capability (Vietnam Factory)

Machinery

# Factory Overview

# Production Equipment

## PP Plastic Extruders

Three large Extruders, two for single-screw and one for twin-screw. They can be used for 3-layer co-extrusion products .Capacity can reach 700 tons per month.

# Production Equipment

## PP Plastic Auto-Cutter

The fast and stable automatic cutting machines are used for ensuring good size quality and efficiency cut.

Multifunctional automatic slitter, which can cut PP sheets in various sizes to satisfy various customer requirements.

# Certifications and Standards

## International Certifications

Obtained ISO 9001 certification, demonstrating the perfection and effectiveness of the company's quality management system.

The certification covers the entire process from product design to production and sales, ensuring consistent product quality.

PART 04

Quality Control

Q.C.

PowerPoint Design

# Full-Process Quality Control System

## Raw Material Inspection

Raw materials are carefully selected from reliable suppliers to ensure consistent quality.

Comprehensive inspection of incoming raw materials, including appearance and performance indicators, to prevent substandard materials from entering the production process.

# Full-Process Quality Control System

## Production Process Control

Strict quality control throughout the production process, from raw material input to finished product formation.

Advanced production equipment and processes ensure stable production and consistent product quality.

# Full-Process Quality Control System

## Finished Product Inspection

Comprehensive testing of finished products, including dimensions, performance, and appearance, to ensure compliance with quality standards. A robust quality traceability system allows for quick identification and resolution of issues.

# Customer Factory Audits

## Customer Factory Audits

Provide comprehensive support for customer factory audits, showcasing factory facilities, production processes, and quality control. Cooperate fully with customer audit requirements, offering detailed documentation and on- site explanations to build trust.
